Our role and functions

PHARMAC is a Crown entity, with the statutory objective "to secure for eligible people in need of pharmaceuticals¹, the best health outcomes that are reasonably achievable from pharmaceutical treatment and from within the amount of funding provided".²

To carry out our objective, PHARMAC's functions include:

Accountability

PHARMAC is accountable to the Minister of Health, who, on behalf of the Crown, is accountable to Parliament for our performance. The Minister also sets the level of the Combined Pharmaceutical Budget (CPB). The Ministry of Health acts as the Minister's agent in monitoring PHARMAC's performance.

¹ 'Pharmaceuticals' are medicines, vaccines, therapeutic medical devices, related products or related things.

² Section 47(a) New Zealand Public Health and Disability Act 2000.

Governance

The Minister of Health appoints PHARMAC's Board, which has all powers necessary for the governance and management of PHARMAC. All decisions about our operation are made by, or are under the authority of, the Board. The Board is responsible for agreeing outputs with the Minister and ensuring expectations of PHARMAC are met.

In addition to the work undertaken by PHARMAC itself, the Board takes objective advice from two statutory advisory committees: the Pharmacology and Therapeutics Advisory Committee (PTAC) and its specialty subcommittees, and the Consumer Advisory Committee (CAC) – a committee of people experienced in consumer issues.³ The Board also has an Audit and Forecast Committee and Health and Safety Committee (comprised of Board members), which provides assistance to the Board on relevant issues.

Reporting

With specific parameters agreed with the Minister of Health, our reporting includes monthly reports, quarterly reporting, ad hoc reports, and reports to Parliament.

Output classes

The output classes below are the services we provide that are directly funded by the Crown. More detailed information about these can be found on page 6.

	Output class	Description	Outputs
1.	Making decisions about pharmaceuticals ⁴	Work that leads to new medicines and medical devices being funded and money being saved on older medicines.	 1.1. Combined Pharmaceuticals⁵ 1.2. Hospital medical devices 1.3. Special access panels 1.4. Named Patient Pharmaceutical Assessment
2.	Influencing medicines access and use	Promoting access to and the optimal use of medicines and ensuring decisions are understood.	2.1. Sharing information/explaining decisions2.2. Population health programmes2.3. Supply management
3.	Providing policy advice and support	Assisting the cohesiveness of the broader health sector.	3.1. Advice and support services to the health sector3.2. Policy advice3.3. Contracts and fund management

Minister's expectations

The Statement of Performance Expectations is guided by the Minister of Health's Letter of Expectations to PHARMAC dated June 2018.

General expectations set by the Minister of Health are to:

• Make investment decisions with a sound evidence base, ensuring interventions and programmes are effective

³ PTAC members are independently appointed by the Director-General of Health. CAC members are appointed by the

PHARMAC Board. PTAC seeks input as required from specialist subcommittees, whose members are also practising clinicians.

⁴ 'Pharmaceuticals' are medicines, vaccines, medical devices, related products, or related things.

⁵ Includes all medicines (whether dispensed in a hospital or community pharmacy), vaccines, and some blood products.

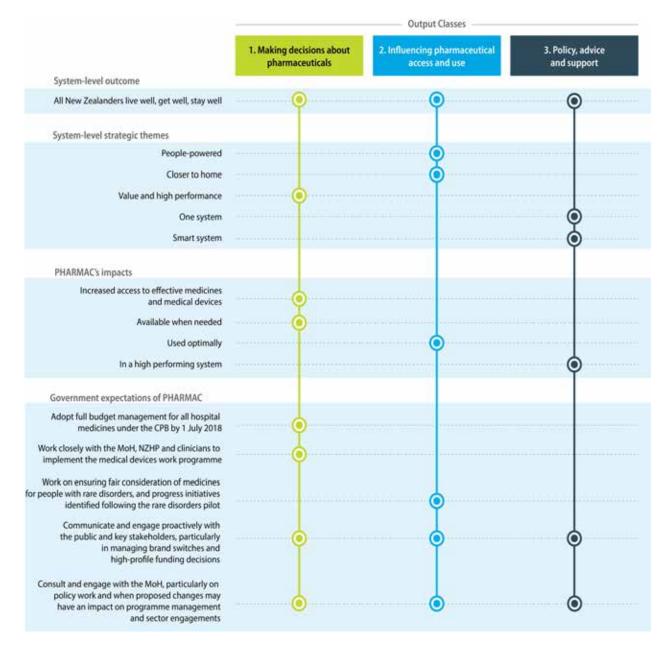

- Maintain a focus on health equity, clearly demonstrating how strategic priorities and supporting actions will make a difference for stakeholders
- Ensure our Board is highly engaged and that the chief executive and management are held accountable for improved performance
- Demonstrate strong and proactive relationships and work constructively with the Ministry of Health and wider health sector
- Work collaboratively to continue to ensure existing infrastructure, information platforms and systems meet Government priorities
- Continue to improve efficiency and effectiveness by working together with other agencies where that is needed to deliver results
- Continue to work constructively with the Ministry of Health and on matters related to 'no surprises' policy
- Work alongside the wider health and disability sector to implement a strong response to climate change.

Expectation	Comment
Adopt full budget management for all remaining hospital medicines under the Combined Pharmaceutical Budget, effective from 1 July 2018.	We are progressing the management of District Health Board hospital medicines expenditure within the CPB. For 2018/19, we propose using a combination of features. We will work with DHBs to ensure a smooth transition. <i>Output: 1.1</i>
Work on ensuring fair consideration of medicines for people with rare	PHARMAC has committed to introducing a set of dedicated features for considering medicines for rare disorders, to get the best out of our existing process.
disorders, and in particular, progressing the initiatives identified following our rare disorders pilot.	Work will focus on policy, commercial matters, and stakeholder engagement.
	Output 1.1
Continue to work closely with the Ministry of Health, New Zealand Health Partnerships Limited and clinicians to implement the medical	We engage in a range of regular and ad hoc meetings with Ministry of Health staff. PHARMAC has established a Memorandum of Understanding with NZ Health Partnerships Ltd (NZHP) which clarifies how we will work together on matters on common interest. PHARMAC meets with NZHP regularly, and supports and participates in the DHBs' Joint Procurement Authority and Procurement Operations Advisory Group.
devices work programme.	We will continue to work with sector stakeholders including clinicians, DHB leaders and DHB agents to develop and implement medical devices management activity.
	Output: 1.2

Specific priorities for PHARMAC, and the relevant outputs for each, are outlined below:

Continue to communicate and engage proactively with the public and key stakeholders, and in particular, to manage brand switches and high-profile funding decisions carefully.	Our work in hospital medicines, hospital medical devices and vaccines includes new partnerships and working relationships with other health Crown entities and the Ministry of Health to support action in areas of mutual interest. This will help to ensure alignment and avoid duplication. We are also identifying opportunities to work with other health sector stakeholders to support health sector and cross-government priorities. This includes working with DHBs and primary care to consider opportunities to shift administration services to community settings, and developing memoranda of agreement with Whānau Ora collectives. PHARMAC recognises the importance of engaging with the public and key stakeholders. Our routine engagement includes public meetings in communities around New Zealand, face-to-face meetings with clinical and consumer groups, attendance at conferences, and business relationships with pharmaceutical suppliers. We will continue to provide resources and evidence-based information to support brand changes and high-profile funding decisions. We have key roles in our corporate structure to ensure implementation of our funding decisions (including brand changes) is managed well.
Consult and engage with the Ministry of Health, particularly on the content of the policy work programme, and when proposed changes may have an impact on programme	We engage regularly with the Ministry of Health on a range of issues including policy and strategic related matters.
management and sector engagements.	All output classes

Fitting it all together – linking our outputs to impacts, health system outcomes and Government expectations

PHARMAC'S ACTIVITIES

What the classes of outputs are intended to achieve

Our main activities for the financial year 1 July 2018 to 30 June 2019 are set out below. Expenditure relating to the output classes is from PHARMAC's operational budget and not the CPB.

The following classes of outputs relate to PHARMAC's impacts.

Output class 1 – Making decisions about pharmaceuticals

Making robust and fair pharmaceutical funding decisions is key to achieving our statutory objective. PHARMAC achieves this by:

- managing the national budget decided by the Minister of Health, in consultation with DHBs, for all medicines use (whether in DHB hospitals or the community) through the CPB
- making decisions about hospital medical devices.

PHARMAC's Operating Policies and Procedures (OPP) inform the way we work. Our processes need to be as efficient and effective as possible, because good quality processes increase the likelihood of making the best possible decisions.

PHARMAC takes into account a broad range of factors important for making robust funding decisions in the New Zealand context. The affordability of decisions is essential since we operate within a fixed budget. However, there are many other factors that PHARMAC considers when making decisions, including clinical risks and benefits, health needs including disease severity, the effect on addressing health disparities – including those experienced by Māori and Pacific peoples – the suitability of the treatment, and cost-effectiveness as measured by Quality Adjusted Life Years (QALYs).

One way to assess the quality of PHARMAC's decision making is to consider the average value for money of the choices we make compared with the average value of all available choices as described in PHARMAC's Statement of Intent 2017/18–2020/21, page 8. The process includes economic analysis, clinical advice from PTAC and specialist subcommittees as appropriate, negotiations with pharmaceutical suppliers and generally public consultation.

Stakeholder voices are important and consumers, clinicians and industry representatives are able to track progress with funding applications for Schedule listings through our online Application Tracker, and contribute to consultations on proposed changes to funded pharmaceuticals (ie. new listings or widened access).

Output 1.1 Combined Pharmaceuticals

Sections B to I of the Pharmaceutical Schedule (the Schedule) contain a list of medicines funded for all New Zealanders through the CPB via DHB hospitals and in the community. The Schedule also includes vaccines, haemophilia treatments, and a small number of medical devices used in the community, such as blood glucose meters and intra-uterine devices.

From 2018/19, funding for all remaining hospital medicines has been included in the CPB.

Output 1.2 Medical devices

Section H also includes the contracts and agreements we've negotiated for hospital medical devices. As of 1 June 2018, these agreements cover approximately \$180 million worth of annual DHB expenditure. During 2018/19, we will continue to work on the national procurement of hospital medical devices where DHBs remain free to choose to use those contracted suppliers or not; and the implementation of market share agreements where DHBs can choose suppliers of certain products only from within a closed list, ahead of transition to full medical device management for DHB hospitals. By early 2020, most medical devices used in DHB hospitals will be listed on the Schedule.

Output 1.3 Special access panels

Some pharmaceuticals are expensive or require nationally consistent assessment of clinical criteria to determine funded access, and to help ensure these are appropriately targeted PHARMAC manages panels of expert clinicians to apply the clinical criteria on which patients can access treatment. Panels are currently maintained for managing treatments of:

- Cystic fibrosis
- Gaucher's Disease
- Haemophilia
- Hepatitis C
- Multiple sclerosis
- Pulmonary arterial hypertension.

Output 1.4 Named Patient Pharmaceutical Assessment (NPPA)

This is the policy that PHARMAC uses to assess applications for individual patients to receive funded medicines that are not otherwise funded through the Schedule. PHARMAC seeks clinical advice on applications from a panel of doctors (the NPPA Advisory Panel) and from individual clinical experts in particular specialities. Funding for NPPA is drawn from the CPB.

2018/19 target	Savings are generated to meet the cost of future volume growth and allow for new investments	The total value and number of hospital medical devices under contract increases
2017/18 estimate	meet nder	
2016/17 actual	\$52 million savings generated to meet the cost of future volume growth and allow for new investments	Total value increased \$50 million to \$109 million and an additional 29,000 hospital medical devices under contract
Rationale	Savings need to be generated every year to meet the cost of growth in demand for funded pharmaceuticals. We also need to generate additional savings so that we can fund new medicines or provide funded medicines to more people	We want to continue increasing the number of hospital medical devices under contract, and the amount of expenditure we have contracts for. This provides us with an indication of the growth of our work and an indication of the savings we will be able to generate to DHBs as our work progresses
Measure	Savings are made to meet cost of growth and to enable new investments The total value and number of hospital medical devices under contract increases	
Output	1.1 Combined Pharma- ceuticals decisions	1.2 Medical devices
Impact	Increased access to effective medicines	devices

How the performance of output class 1 will be assessed:

Output class 2 – Influencing pharmaceutical access and use

Deciding to fund a medicine or contract for a hospital medical device is only part of the pathway to medicines and medical devices reaching New Zealanders who need them. PHARMAC has a legislative function to promote the responsible use of pharmaceuticals and this is an essential part of achieving best health outcomes. We help to ensure that medicines and hospital medical devices are used in the most responsible way – so that they are used when they are needed, and not under- or over- used.

To do this, we need to communicate our decisions and provide information and support so that medicines are prescribed and used well. Good communication helps people understand the reasons for PHARMAC's decisions, and also contributes to realising the health outcomes sought from the funding decision.

PHARMAC aims to support prescribers, pharmacists and patients on optimal prescribing, dispensing and the way people use pharmaceuticals. An important aspect of this is medicines adherence (ensuring patients take the medicine prescribed for them in the way intended by their prescriber). To ensure the medicines that are funded for people are used optimally we take actions to improve health literacy, workforce development and community engagement, and work with health professionals to deliver programmes.

PHARMAC works with other health sector agencies to improve the value of the responsible use programmes we develop. We also work closely with DHBs and their agents to support their uptake of national contracts for hospital medical devices. We are guided by our Māori Responsiveness Strategy, Te Whaioranga, our Pacific Responsiveness Strategy and our access equity goal.

Output 2.1 Sharing information/explaining decisions

We consider feedback from prescribers and pharmacists on the practicality of Schedule changes and regularly meet with health professional groups to obtain input through our consultation processes. We also work alongside some health professional groups in developing our implementation and responsible use activities. We maintain regular contact with patient and consumer groups and welcome dialogue on medicine funding, hospital medical devices, or other issues. To make sure we are asking the right questions of the right people, we take advice from our statutory committee, the Consumer Advisory Committee, on our engagement plans and practices and, from time to time, PHARMAC undertakes engagement and consultation activities with DHBs and the community through a range of measures including regional and national forums, online and social media.

To explain our decisions, we use notification letters, our website, information sent to health professionals and patients to help them adjust to the introduction of new medicines or brand changes, and communication to DHB procurement teams on the availability of national contracts for hospital medical devices. As well as notifying people about our decisions, we also work to implement our decisions in a way that supports both health professionals and patients to thoroughly understand the patient pathway. This can be through targeted provision of clinical advice, working closely with DHB implementation teams, or through more widespread provision of information about the changes.

Output 2.2 Population health programmes

Our population health programmes are developed in response to evidence-based analysis and identified unmet need, and aim to improve access and promote responsible use of medicines. We are also working to understand the barriers that create inequitable access to and uptake of medicines, in order for us to develop programmes alongside health sector partners to address and eliminate these inequities.

Sometimes decision implementation is supported by information provided to health professionals and consumers through our health education programmes, such as He Rongoā Pai He Oranga Whānau, a programme that provides seminars to hauora Māori kaimahi, providing them with clinical information to pass on to whānau.

We also share information and promote evidence-based prescribing to health professionals through the PHARMAC seminars and by contracting services to promote appropriate prescribing through high-quality educational resources.

Output 2.3 Supply management

PHARMAC has dedicated contract management staff, which enables us to be more aware of when supply shortages might arise, and to take action to mitigate them. We are also aware that medicines not on contract are important to patients and need to be monitored. This requires ongoing vigilance of the supply chain to ensure adequate supplies between pharmaceutical and medical device companies, wholesalers, pharmacists, DHBs and patients. PHARMAC manages the storage and distribution arrangements for vaccines.

Currently, PHARMAC also manages the direct distribution of some medicines to patients. PHARMAC regularly considers whether medicines it distributes can be moved into the regular supply chain, through community pharmacies or primary care.

2018/19 target	All DHBs or agents acting on their behalf engage with PHARMAC on implementing hospital medical device national contracts All relevant DHB hospital services will engage with PHARMAC to support hospital medicine changes	Respondents to the survey show at least 75 per cent have made positive changes as a result of attendance
2017/18 estimate	All DHBs or agents acting on their behalf engage with PHARMAC on implementing hospital medical device national contracts All relevant DHB hospital services have been engaged about the move to full budget management. Ongoing engagement with DHBs will be carried out to support hospital medicine changes	Respondents to the survey show at least 75 per cent have made positive changes as a result of attendance
2016/17 result	All DHBs engaged with PHARMAC and made necessary changes to give effect to wound care market share agreements PHARMAC engaged with, and received feedback from, hospital pharmacists and pharmacists and pharm	Respondents to the survey show at least 90 per cent have made positive changes as a result of attendance
Rationale	Willingness of DHBs and their agents to engage with PHARMAC contributes to effective implementation of hospital medical devices contracts and hospital medicine changes	Assessing whether our PHARMAC seminars have a positive effect in improving health professionals' knowledge and behaviour will help us to determine whether the seminars continue to have an impact in the optimal use of pharmaceuticals
Measure	DHB hospital engagement with PHARMAC compared with previous year	Survey of attendants at a PHARMAC seminar show a positive professional change in optimal use behaviour as a result of attendance
Output	2.1 Explaining decisions and sharing information	2.2 Population health programmes
Impact	Pharmace- uticals are used optimally	

How the performance of output class 2 will be assessed:

PHARMAC Statement of Performance Expectations 2018/19

Community-based delivery of programmes will occur in three- quarters of all WOC partner areas and the number of WOC partners increase	We will respond to all low medicine stock reports, communicate effectively and take action as necessary to ensure patient needs for medicines are met			
Community-based delivery of programmes will occur in two-thirds of all WOC partner areas and the number of WOC partners increase	We will respond to all low medicine stock reports, communicate effectively and take action as necessary to ensure patient needs for medicines are met			
PHARMAC increased its agreements with Whānau Ora Collectives from six to 11. Ten out of 11 Whānau Ora Collectives were active	PHARMAC worked with suppliers to manage several stock events A significant number required intervention management by PHARMAC staff; this resulted in continuity of supply to patients Activities included sourcing alternative supply with suppliers and fiasing with Medsafe, wholesalers and distributors			
Whānau Ora Collectives (WOC) are best-placed to assess the needs of their communities for knowledge of medicines relating to Māori health areas of focus	Ensuring we know and understand the impact of stock shortages so we can act to minimise disruption for patients and providers is important for achieving best health outcomes			
Medicines use community health programmes are delivered to a range of health and community workers	Low medicine stock situations are identified and managed so that there are no clinically meaningful consequences to patients			
2.2 Population health programmes	2.3 Supply management			
	Pharmace- uticals are available when needed			

Output class 3 – Policy, advice and support

Output 3.1 Advice and support services to the health sector

PHARMAC provides advice and support for other health sector agencies to improve the costeffectiveness of health spending. This includes managing pharmaceutical spending, providing advice to DHBs on a range of matters including community pharmacy contracting services and medicines distribution, and contributing to the development of a New Zealand Universal List of Medicines and the New Zealand Formulary, among other sector-wide initiatives including those that aim to reduce the administrative workload of clinicians. We have worked closely with DHBs and their agents to support the development of sector procurement strategies at a national level, particularly where this intersects with our extended function to manage hospital medical devices.

Output 3.2 Policy advice

We provide specialist operational policy advice to Ministers and officials from a range of government agencies. This includes meetings, papers, submissions, Ministerial support services and other information.

Output 3.3 Contracts and fund management

PHARMAC manages DHB pharmaceutical expenditure within the budget approved by the Minister of Health. PHARMAC has dedicated contract management resources that enable us to collect rebates from pharmaceutical suppliers. These are distributed back to DHBs.

PHARMAC also has access to a Legal Risk Fund, with a value of \$7.5 million in 2018/19, which is used to meet litigation costs that are not otherwise met from our regular operational spending on legal services.

We also manage a CPB Discretionary Pharmaceutical Fund and a Hospital Discretionary Pharmaceutical Fund. These two funds broaden PHARMAC's options in delivering on our statutory objective. They support long-term management of DHB expenditure and increase PHARMAC's ability to make efficient budgeting decisions by providing the ability to manage investments over financial years, and across Vote Health, for the overall benefit of the health system.

All fund use will be in accordance with PHARMAC PHARMAC staff participate in wider sector forums 2018/19 target policy accordance with PHARMAC policy PHARMAC staff participate in wider sector forums 2017/18 estimate All fund use will be in Pharmacy Action Plan, and the Community Pharmacy Services Agreement range of sector forums, 2016/17 result participated in a wider Strategy development, including the Health All fund use was in accordance with PHARMAC policy PHARMAC staff advisory group sought after is an indication of the quality of advice and contributions we make policy advice to the sector is Effective management of rebates provides certainty to DHBs Understanding whether our Rationale distributed to DHBs participate in and contribute to wider sector forums in accordance with PHARMAC policy PHARMAC staff Measure All rebates are collected and Policy advice management Contract and Output fund 3.2 3.3 performing system Impact In a high

How the performance of Output class 3 will be assessed:

PROSPECTIVE FINANCIAL INFORMATION

Key assumptions

In preparing these financial statements, we have made estimates and assumptions concerning the future, which may differ from actual results. Estimates and assumptions are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

Key assumptions are:

- our Statement of Performance Expectations is contingent on appropriate operating funding and depending on those funding decisions, PHARMAC's activities and associated measures for 2018/19 may change
- *expenditure increases generally* a number of budget lines have assumed cost increases due to changes in PHARMAC's functions
- *operating model* forecast revenue and expense are based on the current business model and policy settings
- personnel costs expenditure in personnel has been increased to deliver on PHARMAC's expanded role and to maintain consistency with other state sector organisations, given PHARMAC's personnel are its key asset
- *operating costs* material one-off expenditure on new software implementation is expected in 2018/19. These expenses are not expected to be capitalised
- prudential reserve the level of PHARMAC's prudential reserve of \$5 million
- *Herceptin SOLD trial* this concluded during 2017/18 and information is provided for comparative purposes only
- Legal Risk Fund (LRF) the balance of the Legal Risk Fund is assumed to remain the same in out-years based on an assumption that fund use is offset by replenishment (interest and transfer of any unspent litigation money in the operating budget)
- *CPB Discretionary Pharmaceutical Fund (CPBDPF)* the balance of the CPB Discretionary Pharmaceutical Fund is based on the final estimate of pharmaceutical expenditure
- *Hospital Discretionary Pharmaceutical Fund (HDPF)* for planning purposes this includes investments in hospital medicine and medical device savings activity. The balance of the Hospital Discretionary Pharmaceutical Fund is based on the movements recorded during the year
- PHARMAC is currently exempt from the imposition of the Crown's capital charge.

APPENDIX 1 – STATEMENT OF ACCOUNTING POLICIES

Reporting entity	Pharmaceutical Management Agency (PHARMAC) is a Crown entity as defined by the Crown Entities Act 2004 and is domiciled and operates in New Zealand. The relevant legislation governing PHARMAC's operations includes the Crown Entities Act 2004 and the New Zealand Public Health and Disability Act 2000. PHARMAC's ultimate parent is the New Zealand Crown.
	PHARMAC's primary objective is to provide services to the New Zealand public by deciding which medicines, medical devices and related products are subsidised to secure the best health outcomes reasonably achievable from pharmaceutical treatment. PHARMAC does not operate to make a financial return.
	PHARMAC has designated itself as a public benefit entity (PBE) for financial reporting purposes.
Basis of preparation	Our financial statements have been prepared on a going concern basis, and the accounting policies have been applied consistently throughout the period.
	Statement of compliance The financial statements have been prepared in accordance with the requirements of the Crown Entities Act 2004, which includes the requirement to comply with generally accepted accounting practice in New Zealand (NZ GAAP).
	The financial statements have been prepared in accordance with Tier 1 PBE accounting standards.
	These financial statements comply with PBE accounting standards.
	<u>Presentation currency and rounding</u> The financial statements are presented in New Zealand dollars and all values are rounded to the nearest thousand dollars (\$000).
	SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES
Revenue	The specific accounting policies for significant revenues items are explained below: PHARMAC is primarily funded from the Crown. This funding is restricted in its use for the purpose of PHARMAC meeting the objectives specified in its founding legislation and the scope of the relevant appropriations of the funder.
	PHARMAC considers there are no conditions attached to the funding and it is recognised as revenue at the point of entitlement.
	The fair value of revenue from the Crown has been determined to be equivalent to the amounts due in the funding arrangements.
Financial instruments	Financial assets and financial liabilities are initially measured at fair value plus transaction costs, unless they are carried at fair value through profit or loss, in which case the transaction costs are recognised in the statement of forecast comprehensive income.
Cash and cash equivalents	Cash includes cash on hand, deposits held on call with banks, and other short- term highly liquid investments with original maturities of three months or less.

Receivables Short term receivables are recorded at their fair value, less any provision for impairment. A receivable is considered impaired when there is evidence that PHARMAC will not be able to collect the amount due. The amount of the impairment is the difference between the carrying of the receivable and the present value of the amounts expected to be collected.

*Investments*Bank term deposits
Investments in bank term deposits are initially measured at the amount invested.
After initial recognition, investments in bank deposits are measured at amortized
cost using the effective interest method, less any provision for impairment.

Property, plant and equipment Property, plant and equipment also consist of leasehold improvements, furniture and office equipment. Property, plant and equipment are shown at cost less accumulated depreciation and impairment losses. Any write-down of an item to its recoverable amount is recognised in the statement of forecast comprehensive income.

depreciated.

- Additions the cost of item of property, plant and equipment, leasehold improvement, furniture and office equipment is recognised as an asset only when it is probable that future economic benefits or service potential associated with the item will flow to PHARMAC and the cost of the item can be measured reliably.
 Work in progress is recognised at cost less impairment and it is not
- *Disposals* gains and losses on disposal are determined by comparing the proceeds with the carrying amount of the asset. Gains and losses on disposals are reported net in the surplus or deficit.
- Subsequent costs costs incurred subsequent to initial acquisition are capitalised only when it is probable that future economic benefits or service potential associated with the item will flow to PHARMAC and the cost of the item can be measured reliably. The costs of day-to-day servicing of property, plant, and equipment are recognised in the surplus or deficit as they are incurred.

Depreciation is provided on a straight-line basis on all property, plant and equipment, leasehold improvements, furniture and office equipment at rates that will write off the cost of the assets to their estimated residual values over their useful lives. The useful lives and associated depreciation rates of major classes of assets have been estimated as follows:

Item	Estimated useful life	Depreciation rate
Leasehold Improvements	5 years	20%
Office Equipment	2.5 - 5 years	20%-40%
Software	2 - 5 years	20%-50%
EDP Equipment	2.5 years	40%
Furniture and Fittings	5 years	20%

Leasehold improvements are capitalised and depreciated over the unexpired period of the lease or the estimated remaining useful lives of the improvements, whichever is shorter. Capital work in progress is not depreciated. The total cost of a project is transferred to the asset class on its completion and then depreciated. The residual value and useful life of an asset is reviewed, and adjusted if applicable, at each financial year end. Intangible assets

Acquired computer software licenses are capitalised on the basis of the costs incurred to acquire and bring to use the specific software.

Costs that are directly associated with the development of software for internal use are recognised as an intangible asset.

Item	Estimated useful life	Depreciation rate
Intangible assets	2-5 years	20%-50%

Payables

Short term payables are recorded at their face value.

Employment Employee entitlements that PHARMAC expects to be settled within 12 months of balance date are measured at nominal values based on accrued entitlements at current rates of pay.

These include salaries and wages accrued to balance date, and annual leave earned but not yet taken at balance date expected to be settled within 12 months.

A liability and an expense are recognised for bonuses where there is a contractual obligation or where there is a past practice that has created a constructive obligation and a reliable estimate of the obligation can be made.

Provisions A provision is recognised for future expenditure of uncertain amount or timing when there is a present obligation (either legal or constructive) as a result of a past event, it is probable that an outflow of future economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

Provisions are measured at the present value of the expenditures expected to be required to settle the obligation using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the obligation. The increase in the provision due to the passage of time is recognised and is included in "finance" costs.

- **Public equity** Public equity is the Crown's investment in PHARMAC and is measured as the difference between total assets and total liabilities. Public equity is classified as contribution capital, retained earnings and reserves, SOLD trial fund, Legal Risk Fund and Discretionary Pharmaceutical Fund.
- **Goods and Services** All items in the financial statements are exclusive of GST, except for receivables and payables, which are stated on a GST-inclusive basis. Where GST is not recoverable as an input tax, then it is recognised as part of the related asset or expense.

The net amount of GST recoverable from, or payable to, the Inland Revenue Department (IRD) is included as part of the receivables or payables in the statement of forecast financial position.

The net GST paid to, or received from, the IRD, including the GST relating to investing and financing activities, is classified as an operating cash flow in the statement of forecast cash flows.

Income Tax PHARMAC is a public authority and consequently is exempt from the payment of income tax. Accordingly, no provision has been made for income tax.

Cost Allocation PHARMAC has determined the cost of outputs using the cost allocation system outlined below.

Direct costs are those costs directly attributed to an output. Indirect costs are those costs that cannot be identified in an economically feasible manner with a specific output.

Direct costs are charged directly to outputs. Indirect costs are charged to outputs based on cost drivers and related activity or usage information.

Critical accounting estimates and assumptions

In preparing these financial statements PHARMAC has made estimates and assumptions concerning the future. These estimates and assumptions may differ from the subsequent actual results. Estimates and assumptions are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below. The value of PHARMAC's Discretionary Pharmaceutical Fund is dependent on the value on the final estimate of the District Health Boards' Combined Pharmaceutical Budget.

<u>Critical judgements in applying PHARMAC's accounting policies</u> Management has not exercised any critical judgements in applying PHARMAC's accounting policies for the years ended 30 June 2018 – 30 June 2020.
